

P

OBJECTIVE

Students will be able to explore and describe the key features of sunny weather (sunlight, warmth, brightness) using real-world objects and guided discussion, building foundational vocabulary and curiosity.

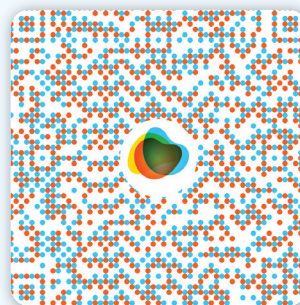

Digital Asset Integration:

Sunny Days

Use this video to introduce the students to sunny weather.

SCAN TO WATCH

Instructional Importance:

This video would be used as an interactive and engaging activity to introduce the concept of sunny weather as an overview to the students. The video helps multi-sensory stimulation for students with different preferences.

1

ACTIVITY

SENSORY CIRCLE: "A SUNNY DAY BEGINS!"

6-8 minutes

Objective:

Students will be able to identify 2-3 sunny day elements (e.g., sun, heat, sunglasses) by engaging with visual, tactile, and auditory props and responding to guided prompts.

Materials

- ☛ Sunny day photo or large illustrated poster
- ☛ Pretend sun cutout or yellow flashlight
- ☛ Audio clip: birds chirping, soft breeze
- ☛ Real/tactile props: sunglasses, hat, mini fan or paper sun
- ☛ Weather chart with sun symbol
